EASTLAND COULD CARRY 3.300 SAFELY, REPORT

Inspectors Say Vessel Had Often Taken as Many Passengers as on Fatal Trip.

That the steamer Eastland, which turned over in the Chicago River recently carried as many passengers safely on voyages on the Great Lakes, was the substance of a report by two steamboat inspectors for Great Lake districts familiar with the history and operations of the South Atlantic district.

A slight depression over Southeastern Virginia, with the high area to the northeastward, has caused rains in the Upper Ohio Valler, the Middle Atlantic States, and showers in the northern part of the South Atlantic district.

the vessel are among the oldest and gen-erally regarded as the most efficient in

GIVE GRAFT TIPS

Police Inquiry Will Be Vigorously Continued by District Attorney's Office.

MAY HOLD CONFERENCE

Laskey, Hawken, and Maj. Pullman to Sift the Evidence

The police graft investigation will be rigorously continued by the District at-orney's office up until the meeting of the grand jury on September 8. A great bulk of evidence already has been obtained. but there are numerous allegations and rumors that still are being run down by the District attorney and his assistant. Samuel McComas Hawken.

One witness yesterday was questioned in some detail by Mr. Hawken at City Hall. Other witnesses will be summoned to his office this week for examination. It is understood that these witnesses are being called not primarily for the unveiling of new evidence, but for the further corroboration of allegations now in the possession of the office.

District Attorney Laskey declined to state last night whether the evidence already in the hands of his office is deemed sufficiently strong to warrant the rec-ommendation that indictments be return-ed by the grand jury against certain members of the police force. It has been learned, however, upon good authority that for several weeks the District attorney has been in possession of facts which in themselves are considered by some suf licient to warrant indictments against possibly half a dozen policemen, includ-ing several above the rank of private. It is believed that the District attorney

tion and to run down every possible clu efore presenting the material to the erand jury for its consideration. It is ikely that prior to the meeting of the grand jury a conference will be held by Maj. Pullman, superintendent of police;
District Attorney Laskey, and Assistant
Prosecutor Hawken to go over all the
details of the investigation.

Maj. Pullman has announced that as
soon as the District attorney's office is
ready to present demanting evidence.

lesires to complete entirely his investiga

ready to present damaging evidence to the grand jury he will issue orders temporarily suspending from the force the policemen involved. No action will be taken by him prior to that.

The Town Crier

The Sigma Nu College Fraternity, at its annual national convention at Den-ver, Colo., admitted to the organizaion a chapter formed recently at the George Washington University.

Fifty printers of Boston, who attended the printers' tournament at Philadelphia during the week, arrived in Washington yesterday on their way home. A reception will be held in their honor at Typographical Tample from 2 until 5 clock this Temple from 2 until 5 o'clock this afternoon. Monday they will be shown through the Government Printing Office. The party will leave Tues

SECRETARY GARRISON TO STAY IN CABINET

Rumors that He May Accept Jersey Governorship Nomination Are Denied.

Rumors that Secretary of War Garrison is about to resign his position in the Wilson Cabinet to accept the Demo-**ROBBERS RIFLE SAFE** cratic nomination for governor of New Jersey were discredited here last night. It was said on high authority that Mr. Garrison has no intention of resigning. It is believed that Democratic leaders in New Jersey have sought to impress the Secretary with the importance of the party service he could render by becoming the standard bearer next year. but they have received no encourage-ment either from Mr. Garrison or the White House. Friends of the President say it is manifestly impossible for him to give up the services of the Secretary to give up the services of the Secretary of War at this time when the administration is about to launch its national defense program of War at this time when the adminis-

defense program.

Another rumor has it that Secretary of Commerce Redfield is about to leave the Cabinet because of President Wilson's for investigation one suspect, a young displayable of the modern of the state Cabinet because of President Wilson's displeasure at the way he conducted the investigation of the Eastland investigation at Chicago. The best information obtainable, however, is that the President has seen no evidence of bad judgment in Mr. Redfield's official acts following the sinking of the Eastland and that the latter's hold upon his position is just about as secure as that of

U. S. HAS 200,000 SLAVES TO 'DOPE'

M. L. Wilbert, of the Public Health Service, Says Estimates Have Been Inflated.

BASED ON STATISTICS

Experts Say Total of 1,416,000,000 Average Doses Are Consumed Each Year.

There are not more than 200,000 drug fiends in the United States. This is quite at variance with the popular belief, strengthened by the unofficial reports re-cently appearing in the public prints fol-

lowing the going into effect of the Har-rison anti-drug law.

Martin L. Wilbert, technical assistant in the hygienic laboratory of the United States Public Health Service, is author-ity for the cheering statement that the popular estimates of the number of drug sers in the nation have been inflated No Crime Wave Has Resulted.

Mr. Wilbert gives the results of his observations in a recent report. He says that while there have been reports from pospitals and like institutions of great suffering in isolated instances following the inability of drug addicts to obtain their favorite "dope," the number of such reports has fallen far short of general expectations. There has been no wholesale besteging of hospitals by "coke" upper such powers of gring following the supers of the standard programments. 'coke' users, and no wave of crime, fol-owed by a trail of suicides, has swept

the country.

Fairly reliable data are available on which to base an estimate of the number of drug users, according to the Federal expert. This is due to the fact that practically all the opium and coca used in this country is im-ported through legitimate channels and considerable care is used to in-sure reporting and recording of the supply because of the comparatively high import tax. These figures fix the amount of available material and Mr. amount of available material, and Mr Wilbert asserts that quite regardless of the legitimate or illigitimate use of drugs, the total illegitimate use canot well exceed the sum total of avail-

be a total of something more than 118,000 drug users. They would con-sume approximately 1.416,000,000 aver-age doses a year. The average con-sumption a day of morphine addicts is

Authorities agree that an ounce of cocaine is enough to keep one flend of this character thoroughly well of this character thoroughly well doped for a year. On this basis, he asserts, granting that all the available 150,000 ounces of cocaine were used illegitimately, there could not be more than 150,000 cocaine fiends in the United States. But a lot of cocaine were used in the used legitimately, he argues.

The first event will be diving from the surface, breaking wrist hold and picking up partner from seven feet under water. caine is used legitimately, he argues, so these figures are too high.

Taking all available facts into con-

Taking all available facts into consideration, therefore, the conclusion is reached that the estimate that there are not more than 200,000 "dope fiends" in the whole United States, is
